Create Cluster

On-Demand capacity

\$

You get \$15.00/month free shared across all of your Basic clusters!

Capacity scales automatically to meet demand and you pay for what you use. All CockroachDB Cloud accounts are given 50 million RUs and 10 GiB storage for free to be used across all Basic clusters. Further resources are priced at \$0.50/GiB and \$0.20/1M RUs. [Learn more about capacity.](#)

Unlimited

Your cluster will have unlimited capacity to scale according to your application's needs.

Set a monthly limit

Set a capacity or dollar limit for the month. If you reach your limit, you will lose access to your cluster.

The screenshot shows a web browser window with the CockroachDB cluster overview page. A modal window titled "Connect to prime-goose" is open, displaying connection instructions and configuration options. The modal includes dropdowns for "Select SQL user" (sphinx), "Database" (defaultdb), "Select option/language" (General connection string), and "Select operating system" (Windows (detected)). The background shows the CockroachDB interface with a sidebar menu and a cluster overview table.
